FOOD FRIENDLY® GRINDING BURRS FOR COFFEE BEANS

Dear customer,

Try our LINE of FOOD FRIENDLY® grinding burrs

*After four successful years, Italmill Grinding Technology® can confirm that the grinding burrs manufactured in **Food Friendly®** version, **patented** by us, put together three basic criterions for choosing this product:*

RELIABILITY

LIFESPAN

LESS CONTAMINATION

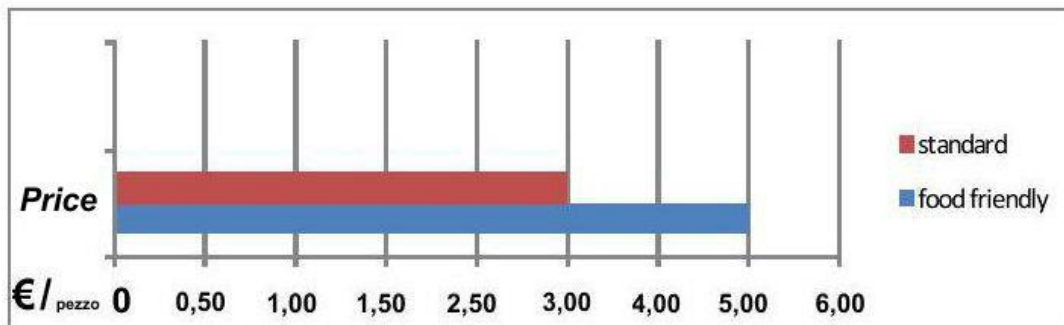

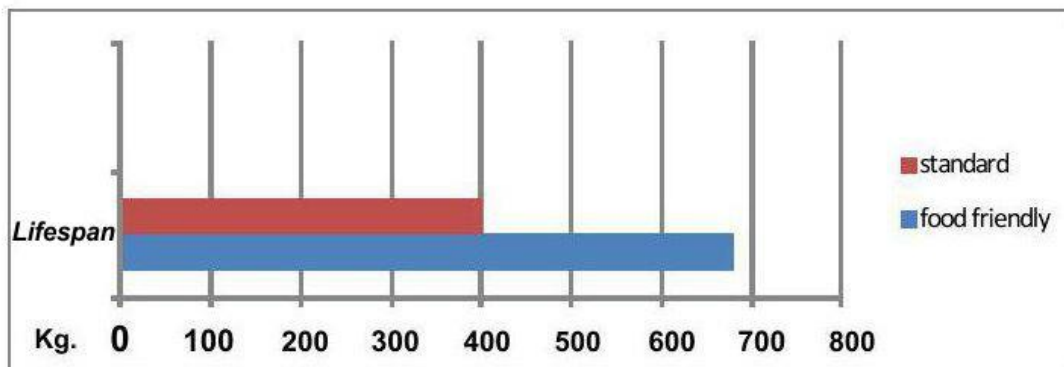

FOOD FRIENDLY® GRINDING BURRS FOR COFFEE BEANS

Reliability: our grinding burrs do not undergo deformations, thanks to the particular heat treatment they have been subjected; they **settle** right after the first grinding, not needing other setting time during the first setup.

Lifespan: these grinding burrs are realized with a special steel and they undergo particular processing and heat treatments which ensure a **longer life of 70%** compared to a standard grinding burr (**STEEL mill**) produced in steel 18NiCrMo5, hardened and tempered in atmosphere.

Less contamination: these new grinding burrs have been expressly created so that **the ground coffee has only a minimal contamination** coming from the detachment of surface residuals of metal parts, as certified in the documents shown below.

Numero campione: 3.018/AL Data ricevimento: 13/07/10 Data inizio prove: 13/07/10 Data termine prove: 22/07/10 Categoria Merceologica: CAFFÈ (ALIMENTI AD USO UMANO) Prodotto dichiarato: caffè torrefatto Descrizione Campione: Caffè macinato con le macine in acciaio 18NiCrMo5 Etichetta Campione: Descrizione Sigillo: Quantità Campione: 1000 g Restituzione Campione: No Imballaggio: Confezione integra Procedura Campionamento: Campione pervenuto tramite corriere espresso Data di Campionamento: 13/07/10
